

Office of Economic and Demographic Research
Data Visualizations Update
May 7, 2024

The Office of Economic and Demographic Research (EDR) has begun creating data visualizations for many of the products available on the EDR site. Data visualization is the use of graphical representations to make data more accessible through the use of charts and graphs which allow the user to interact with the data in a meaningful way.

To the extent possible, EDR has standardized user navigation and interaction across all of the data visualizations. EDR has also created help screens to assist users in navigating the data visualizations.

A background color scheme has been developed to indicate the type of data used in each visualization. Below is a list of the background colors for the various types of data.

Color	Data Type
Grey	Statutorily required data
Green	Conference product data
Blue	Adopted forecast results
Mauve	Other data

EDR will be introducing new visualizations throughout the next year. When available, a link will appear in the subject area with the **[pbix]** extension for the visualization.

Currently, visualizations are only available on the following EDR pages:

- [Local Government Financial Reporting](#)
- [Local Government Economic Development Incentives Report](#)
- [Expenditures and Revenues Reported by Florida's Local Governments](#)
(Revised to include LFY 2021-22 data and Expenditure data)

For questions and comments about the visualizations, please send an email to: EDR-Visualizations@leg.state.fl.us
