

Florida Economic Estimating Conference

January 16, 2018

The Florida Economic Estimating Conference met on January 16, 2018, to revise the forecast for the state's economy. The latest forecast was slightly weaker in several key respects, but generally shows little change from the assumptions made in July for the short term. Overall, Florida growth rates are returning to levels that are more typical and continue to show progress. The drags—particularly construction—are more persistent than past events, but the strength in tourism is largely compensating for this. In the various forecasts, normalcy was largely achieved by the end of Fiscal Year 2016-17 as most measures of the Florida economy had returned to or surpassed their prior peaks by the close of the fiscal year.

One of the main factors used to measure the economic health of an individual state is personal income growth. Using the latest revised series, Florida's personal income growth in the third quarter of 2017 was 0.7 percent over the second quarter of 2017, ranking Florida 18th in the country among all states. The current rank is lower than the previous quarter's results, but higher than the first quarter of 2017 with a growth rate the same as the nation for the current quarter. The forecast expects personal income growth to accelerate to 4.3 percent in Fiscal Year 2017-18 and to 5.5 percent in Fiscal Year 2018-19, and then grow over the long term at annual growth rates ranging between 4.2 percent and 5.4 percent.

U.S. Bureau of Economic Analysis

Two key measures of employment are job growth and the unemployment rate. The job market in Florida continues to grow at modest rates, with a 2.1 percent growth rate for nonfarm employment for the third quarter of 2017 compared to the same period last year. The forecast expects total non-farm employment to grow 2.5 percent in Fiscal Year 2017-18, with more modest rates of growth throughout the long run.

Florida's unemployment rate continues to drift downward and is now below the "full employment" unemployment rate (assumed to be about 4 percent). The state's actual unemployment rate in December was lower than the nation at 3.7 percent, compared to 4.1 percent in the U.S. The

rate was as low as 3.1 percent from March through April 2006 (the lowest unemployment rate in more than thirty years), and most recently peaked at 11.2 percent from November 2009 through January 2010. The forecast expects the downward trend to continue towards a long-term rate of unemployment of around 4.5 to 4.6 percent.

Overall, the housing market continues to trudge forward, although slowing from the stronger growth over the past few years. For the third quarter of 2017, single-family building permits were 8.2 percent higher than the same period last year, while multi-family building permits were 7.9 percent higher. Combined, total private housing starts are expected to increase 10.8 percent in Fiscal Year 2017-18 before easing to a rate of 8.6 percent in Fiscal Year 2018-19 and to much more modest growth rates in the rest of the forecast. Total private housing starts are still well below the peak Fiscal Year 2004-05 level of 272,000 units; they do not recover to their previous peak level at any time during the ten-year forecast period. Total construction expenditures (including nonresidential and public, as well as residential) continue to grow throughout the entire forecast period, with 11.8 percent growth in Fiscal Year 2017-18 and 8.0 percent in Fiscal Year 2018-19 before gradually settling in the 4.3 to 4.7 percent range towards the end of the period. Helped by the nonresidential component, total construction expenditures return to peak levels by Fiscal Year 2019-20, although the private residential component does not return to peak levels until Fiscal Year 2021-22. In a related measure, the construction employment sector does not get back to its peak level at any time during the ten-year forecast period.

New light vehicle registrations have been a source of strength in the Florida economic forecast over the past few years but declined by 2.6 percent in Fiscal Year 2016-17. New light vehicle sales for the third quarter of 2017 were down 7.4 percent over the same period last year. Relative to the prior forecast, further slowing in this measure is expected through Fiscal Year 2024-25 as consumers replace their older vehicles and interest rates increase. The forecast predicts only modest growth for the entire ten-year period.

Florida tourism is a major component of the state’s economy and continues to show its strength. Preliminary estimates indicate that 29.2 million visitors came to Florida during the third quarter of 2017 for an increase of 3.5 percent over the same period in 2016. The forecast for Fiscal Year 2017-18 expects this trend to continue with a projected overall growth rate of 4.7 percent, in spite of a reduction in the number of overseas visitors compared to the prior year. After an acceleration to 5.1 percent in Fiscal Year 2018-19, the expected growth in total visitors stabilizes at growth rates ranging between 3.3 percent 3.6 percent annually over the rest of the long run forecast.

Florida Economic Estimating Conference

Peak Annual Levels

Executive Summary		Peak Fiscal Year	Peak Annual Level	Year Projected to Pass Peak Level - January 2018 Forecast
1.	Personal Income	2016-17	965,122.73	
2.	Real Per Capita Income	2015-16	42,376.47	
3.	Non-Farm Employment	2016-17	8,504.78	
4.	Total Private Housing Starts	2004-05	272.25	NIFH
5.	Total New Light Vehicle Registrations	2005-06	1,463.93	NIFH
