

Education Estimating Conference
Public Schools Capital Outlay Full-Time Equivalent Membership
Executive Summary
June 29, 2022

On June 29, 2022, the Education Estimating Conference met in the first phase of a two-stage process to adopt a forecast for Capital Outlay Full-Time Equivalent Membership (COFTE) through the 2032-33 school year. The forecast was developed based on a cohort survival method that incorporated both recent and long-term trends, with reported 2021-22 COFTE enrollment used as the forecast base. The second stage of the process, district review, resulted in no objections to the initial Conference product.

The following table shows the state-level COFTE enrollment as adopted by the Conference. The “Annual Change” column represents the statewide change in enrollment from the prior year. Variations in annual change are due to different-sized grade cohorts moving through the public school system over time, as well as program participation estimates that impact the number of children expected to be in district-owned facilities. For the purposes of facility planning, COFTE growth is calculated at the individual district level as the difference between the current year and the maximum of the prior three years.
