REVENUE ESTIMATING CONFERENCE

TAX: Sales/Corporate/Beverage/Insurance Premium

ISSUE: Scholarship credit

BILL NUMBER(S): CS/CS/CS/HB 859 **SPONSOR(S):** Representative Corcoran

MONTH/YEAR COLLECTION IMPACT BEGINS: FY 2012-13

DATE OF ANALYSIS: March 16, 2012

SECTION 1: NARRATIVE

1. Current Law: Tax credit cap amount is \$218.8 million in state FY 2012-13, with a 25% increase in the cap in each subsequent year if actual credits reach 90% of the cap for the prior year.

2. Proposed Change: Tax credit cap amount is increased to \$229.0 million in FY2012-13, with changes in eligibility criteria.

SECTION 2: DESCRIPTION OF DATA AND SOURCES

- 1. REC estimates Current law Scholarship credit impacts January 2012
- 2. DOR Monthly SFO report (March 05, 2012)
- 3. Impact conference- January 13, 2012

SECTION 3: METHODOLOGY (INCLUDE ASSUMPTIONS AND ATTACH DETAILS)

- 1. Assumed scholarship credit cap is reached in every year till end of forecast horizon, therefore cap increases by 25% in each year.
- 2. Corporate income tax credit is assumed a ceiling at FY 2012-13 level of \$54.6 million.
- 3. Other sources (Beverage, Sales and IPT) are expected to be claimed at FY 2011-12 percentage shares, apportioned to reach the cap.
- 4. No soft ceiling is assumed based on December 16, 2011 impact conference.
- 5. For FEFP impact and net impact, refer to the FEFP analysis.

SECTION 4: PROPOSED FISCAL IMPACT

State Impact:	FY 2012-13	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16

Students entering kindergarten and grade 1 have no change in eligibility.

I. Estimates for students filling occupied slots. These are grades 2-5 private school students now eligible under bill.

Section 1: Students in Private School 2005-2009; Source for total students is U.S. Census Bureau, 2005-2006 American Community Survey, Source for students with family income less than 185% of the poverty level comes from the American Community Survey 2005-2009 estimates, public use microdata sample. Data may also include some home school students.

Section 3: Estimated breakdown of students in Section 2 column B by who receive a scholarship in 2011-12 and who do not receive a scholarship in 2011-12 but would be eligible under the bill.

	A.	В.
	Students receiving tax-credit	Students not receiving tax-credit
	scholarship	scholarship
Total Grades 2-12	13,303	736
Grades 2-4	10,634	-
Grades 5	2,669	736

All of the students in section 3 are considered in the population of students in occupied slots who might receive a tax-credit scholarship. From the June 2010 Quarterly Report on this program, 83.6 % of all students receiving a tax credit scholarship are enrolled in religious schools. It is assumed that the percentage of students in religious schools with family income less than 185% of poverty level is higher than in all private schools. This population is considered available beginning in 2012-13 and the population is reduced as these students receive scholarships. These students contribute to the FEFP Savings at 0% rate. It is estimated that about 27% of this population would enter each year until the pool of students is exhausted. To get the percentage estimate, the total occupied slots newly eligible (736) was divided by the sum of 736 and the number of eligible students in grade five who entered public schools in grade 5 from public schools in 2010-11 (1991). 736/(736+1991) = 27%.

II. Students filling empty slots in grades 2-12.

Types of students who might fill empty slots: Students in this category under current law consists of eligible students leaving public schools. Students in this category under the bill would be the former in addition to grades 2-5 income eligible students who would have had to leave private school to enter public school for financial reasons, income eligible students entering from home education, and income eligibe students moving into the state from other areas. These four groups compete for the same slots, called empty slots in this analysis. The first two groups contribute 100% to the FEFP savings; the home education students contribute to FEFP savings at rate of 0%; the students from other areas contribute at an indeterminate rate. The number of income eligible home education students who would choose to enter a private school with a scholarship is indeterminate. Thus, this analysis fills the empty slots at 100% contribution to FEFP savings.

Estimate of empty slots: Total slots to be filled minus the occupied slots filled.
