

Voluntary Prekindergarten Estimating Conference Executive Summary April 1, 2021

The Voluntary Prekindergarten (VPK) Estimating Conference met on April 1, 2021, to adopt a revised forecast through Fiscal Year 2025-26. As part of its analysis, the Conference reviewed the latest administrative policies relating to the Coronavirus outbreak that affect VPK enrollment, as well as weekly data collected from the EFS Modernization portal by the Office of Early Learning through March 29, 2021. The school year data from the EFS Modernization system for 2020-21 through January 2021 provided a snapshot of recent enrollment and payment activity. Other new information included a revised birth forecast consistent with the latest Demographic Estimating Conference.

The 2020-21 school year data from the end of January and weekly data through March 29th indicate an increase in enrollment since the last conference. To estimate the entire school year, a comparison of projected end-of-year enrollments to the same time period a year ago was made using the new data. The estimated 2020-21 school year enrollment is now 120,738.56 FTE relative to the 113,935.67 FTE adopted in November.

To restore normal trends in tandem with the distribution of vaccines, the Conference adopted an overall summer forecast level similar to 2019. To reach this decision, the Conference took account of the pool of children that have the ability to participate in VPK this summer, as well as the most recent administrative policies affecting the timing of summer. As a result, enrollment was shifted to reflect increased participation in the second half of summer due to some providers having a later end date for the school year and the possibility of a later starting summer program with reduced hours. This bifurcated effect is also in keeping with vaccine availability becoming more widespread as summer progresses. The combined effect resulted in a forecast of 122,988.27 FTE for the entire 2020-21 fiscal year, or 7,058.16 FTE higher than the previously adopted forecast.

Going forward into 2021-22, expectations regarding program growth continue to be shaped by annual growth in births from the four years prior to enrollment. Florida births have been slowing and posted a markedly reduced level in 2020, affecting the outermost years of the forecast relative to last conference. The forecast uses an alternative 2020-21 enrollment base, one that is based on growth in births absent any impacts from the pandemic. Overall, the enrollment forecast starts from 158,522.93 FTE in 2021-22 and then declines to 152,782.30 FTE in 2025-26 due to the changes in the assumed birth rate. The new forecast produces a participation rate of 74.0% in the outermost year, increasing from 57.2% in the current year.

Forecasted FTE Student Enrollment for the VPK Program

Comparison of Input Data and Forecast Assumptions December 10, 2020 and April 1, 2021 Voluntary Prekindergarten (VPK) Estimating Conferences

	December 10, 2020 Conference	April 1, 2021 Conference
Inputs		
School Year Program 2020-21	<i>Reported as of November 2020</i> Reported VPK Enrollment: 119,908 Estimated VPK Enrollment: 123,689 Estimated VPK FTE: 113,935.67 Estimated FTE to Enrollment Ratio: 92.11%	<i>Reported as of January 2021</i> Reported VPK Enrollment: 125,424 Estimated VPK Enrollment: 131,070 Estimated VPK FTE: 120,738.56 Estimated FTE to Enrollment Ratio: 92.12%
Summer 2021	Estimated VPK Enrollment: 3,097 Estimated FTE Enrollment: 2,707.35 Estimated FTE to Enrollment Ratio: 87.42%	Estimated VPK Enrollment: 4,665 Estimated FTE Enrollment: 4,384.78 Estimated FTE to Enrollment Ratio: 93.99%
Population	<i>Estimated based on November 2020 Demographic Estimating Conference:</i> October 1, 2019: 234,528 October 1, 2020: 236,844 October 1, 2021: 236,811	<i>Estimated based on March 2021 Demographic Estimating Conference:</i> October 1, 2019: 234,627 October 1, 2020: 237,289 October 1, 2021: 237,562
Assumptions		
Population Participation	Using the revised data series, participation rates will be 73.7% in 2025-26. The program growth rates are based on birth growth rates.	Using the revised data series, participation rates will be 74% in 2025-26. The program growth rates are based on birth growth rates.
School Year	For school year, enrollment data through October 2020 and data as of December 7, 2020 were analyzed. The data were extrapolated to estimate school year using ratios of enrollment for the same time periods last year and final. The outer years are based on a forecast of births.	For school year, enrollment data through January 2021 and data as of March 22, 2021 were analyzed. The data were extrapolated to estimate school year using ratios of enrollment for the same time periods last year and final. The outer years are based on a forecast of births.
Summer	For summer 2021, enrollment is based on a combination of summer 2019 and 2020 levels. Summer 2021 FTE is based on summer 2019 FTE ratios. Summer 2022 and beyond is held constant to summer 2019 levels.	For summer 2021 , enrollment is based on a combination of summer 2019 and 2020 levels. Summer 2021 FTE is based on summer 2019 FTE ratios, shifted to allow more FTE in the July/August time period. Summer 2022 and beyond is held constant to summer 2019 levels.
School Year Relationship between FTE Enrollment to Enrollment	A combination of 2018-19 and 2019-20 FTE ratios by county was used to estimate school year FTE ratios for 2020-21 and beyond.	A 2018-19 ratio by county was used to estimate school year FTE ratios for 2020-21 and beyond.
Specialized Instructional Services Program (SISP)	School-year and Summer enrollment reflects data from the EFS Modernization system. Each SISP student that is still active in the program, is assumed to earn 1.0 FTE. The forecast period assumes an FTE of 1.0 for all projected SISP students. If a child starts SISP during the school year, it is assumed that the FTE is accrued in the school year. If a child starts SISP during the summer, their FTE is distributed throughout the summer, across the two fiscal years.	School-year and Summer enrollment reflects data from the EFS Modernization system. Each SISP student that is still active in the program, is assumed to earn 1.0 FTE. The forecast period assumes an FTE of 1.0 for all projected SISP students. If a child starts SISP during the school year, it is assumed that the FTE is accrued in the school year. If a child starts SISP during the summer, their FTE is distributed throughout the summer, across the two fiscal years.
