

Florida County & Municipal Economic Development Incentives: Local Fiscal Year 2017-18 Report

**A Summary of County and Municipal Government Responses
to the Reporting Requirements Outlined in
Sections 125.045 and 166.021, Florida Statutes**

June 2021

**The Florida Legislature's
Office of Economic and Demographic Research**

Reporting Requirements

During the 2010 Regular Session, the Florida Legislature enacted Committee Substitute for Senate Bill 1752 related to economic development, which was codified as Chapter 2010-147, Laws of Florida. The law amended sections 125.045 and 166.021, Florida Statutes, to impose new economic development reporting requirements on county and municipal governments.

The law requires the following:

- An agency or entity that receives county or municipal government funds for economic development purposes pursuant to a contract between the economic development agency/entity and the local government to submit a report on the usage of the local funds. It also requires the county or municipal government to post a copy of that report on its own website.
- County and municipal governments that grant economic development incentives in excess of \$25,000 to report the amount and types of incentives provided to the Florida Legislature's Office of Economic and Demographic Research by January 15th of every year.
- The Office of Economic and Demographic Research to compile the economic development incentives provided by each local government in a manner that shows the total of each class of economic development incentive provided.

This report also includes local economic development incentives granted by Community Redevelopment Districts (CRAs), which are county or municipal dependent special districts.¹ As such, each CRA is treated as a component unit of its governing county or municipality. These governments include separate figures for their respective CRAs as part of the Annual Financial Reporting requirements. Therefore, CRAs fall within the purview of the statutes regarding local government economic development incentive reporting. However, for ease of reporting and to maintain consistency with prior reports, EDR treats them separately. EDR issues a stand-alone survey to all CRAs, using the same four categories required for counties and municipalities, thus preserving the time series from prior years as well as enabling the results to be combined for full reporting.

This report reflects the reported LFY 2017-18 economic development data that were submitted by county and municipal governments and CRAs. Based on those submissions, this report includes (1) the total of each class of economic development incentive granted by individual entities, and (2) the cumulative totals of each class of economic development incentives for county governments, municipal governments, and CRAs. Pursuant to law, copies of this report are provided to the President of the Senate, the Speaker of the House of Representatives, and the Department of Economic Opportunity. Additionally, this report is posted to the EDR's website.²

Background

Population growth is typically the state's primary engine of economic growth, fueling both employment and income growth. Florida's population growth is forecast to average 1.36% annually between 2021 and 2025, which is double the average annual growth nationally. Almost all of Florida's population growth

1. Part III of Chapter 163, F.S., authorizes counties and municipalities to create a Community Redevelopment Agency (CRA), a dependent special district, to carry out redevelopment of designated slum or blighted areas. CRA governing boards are usually identical to the governing board of the county or municipality or are appointed by the respective governing boards. According to the Florida Department of Economic Opportunity's Special District Accountability Program, there were 228 active CRAs in Florida at the time of the EDR survey.

2. <http://edr.state.fl.us/Content/local-government/reports/index.cfm#incentives-report>

through 2030 is expected to come from net migration.³ Population growth in isolation naturally attracts those businesses that are market dependent. These are projects where the principal reason for a new business to move to Florida or for an expansion of an existing business is that their expected clients will be primarily or solely based in Florida. The amplified boost to the economy that comes from exported products and services is not due to these types of businesses. For this reason, governments may seek to alter the natural path of the economy through active intervention.

The scholarly definition of economic development is much broader than generally understood in practice: it is the active government pursuit of economic growth and improvements in terms of population, gross domestic product, output, tax base, jobs, wages, per capita income, capital investments, and the overall well-being of citizens. Applying this definition, Florida's economic growth is affected by nearly everything state and local governments do—from public school funding to road-building to the regulation of a specific industry. Ideally, economic growth is boosted by key government investments in public infrastructure and resources, provision of desired public services such as quality education and publicly-accessible research at universities, development of a technologically strong workforce, promotion of community development, and general improvement of the business climate. These investments also constitute economic development.

While the array of potential strategies is broad, the approaches favored by many local governments have tended to target the expansion of capital investment and the creation of new job opportunities (preferably at above-average wages) at the business level. In this regard, the focus is on new business activity that brings new wealth, which when spent in the economy, induces the creation of additional jobs. To the extent this goal is achieved, the tax base is expanded, and governments may realize an increase in tax revenues.

Often, a cornerstone of these local strategies is the direct or indirect provision of economic development incentives to individual businesses. Incentives are public subsidies intended to induce an economic activity or capital investment by a private business in a jurisdiction in which such activity or investment would not otherwise take place. From the business perspective, economic development incentives are cash or other financial infusions that reduce capital or operating costs and may facilitate location or expansion decisions. This report analyzes all incentives of this nature that are provided by local governments in Florida.

Economic Development Incentives

To the extent granted or unrestricted by state law, counties and municipalities have authority to promote economic development in their jurisdictions through a variety of strategies.⁴ Since 1995, state law has provided explicit authority for counties and municipalities to “expend public funds to attract and retain business enterprises, and the use of public funds toward the achievement of such economic development goals constitutes a public purpose.”⁵ This authority also includes “making grants to private enterprises for the expansion of businesses existing in the community or the attraction of new businesses to the community.”

3. Office of Economic and Demographic Research, *Florida: An Economic Overview* (December 30, 2020) available at http://edr.state.fl.us/content/presentations/economic/FIEconomicOverview_12-30-20.pdf

4. See Article VIII, Sections 1 and 2 of the State Constitution, which provides expansive home rule authority to Florida counties and municipalities. Statutory preemptions and charter limitations impose limitations on this authority. In addition, Article VII, Section 1 of the State Constitution preempts all taxing authority (with the exception of ad valorem taxes) to the state.

5. See Sections 125.045 and 166.021(8), F.S.

Part III of Chapter 163, F.S., authorizes counties and municipalities to create a Community Redevelopment Agency (CRA), a dependent special district, to carry out redevelopment of designated slum or blighted areas. Funding for CRAs is generated through Tax Increment Financing (TIF), by which the taxable value of property within the area is fixed at a certain date and the subsequent annual increment increase in tax revenue to the county and municipality from the redevelopment area is deposited in a trust fund. These diverted property tax revenues are used to fund initiatives by the CRA. Redevelopment may also be financed by revenue bonds issued by the county or municipality on behalf of the CRA.⁶

CRA funds are used to pay administrative expenses related to redevelopment efforts; to acquire property; to pay for improvements to public infrastructure; for the development of affordable housing and community policing innovations; and to subsidize festivals and other community entertainment events. Some CRAs offer multi-year grants to developers of privately owned property per development agreements, typically calculated as a percentage of the increment increase in property taxes generated by the improvements to the property.⁷ Some municipalities have reported that their CRAs function as their economic development entities.

For the annual survey and report, local government economic development incentives are classified by statute into the following four general types:

- Direct financial incentives to businesses.
- Indirect financial incentives benefiting businesses.
- Tax-based and fee-based incentives to businesses.
- Below-market rate leases or deeds for real property given to businesses.

To the extent that local governments expend funds or forego revenue through these means, they qualify as economic development incentives for the purposes of this report.

6. The Florida Redevelopment Association offers this description:

Tax increment financing is a unique tool available to cities and counties for redevelopment activities. It is used to leverage public funds to promote private sector activity in the targeted area. The dollar value of all real property in the Community Redevelopment Area is determined as of a fixed date, also known as the “frozen value.” Taxing authorities, which contribute to the tax increment, continue to receive property tax revenues based on the frozen value. These frozen value revenues are available for general government purposes. However, any tax revenues from increases in real property value, referred to as “increment,” are deposited into the Community Redevelopment Agency Trust Fund and dedicated to the redevelopment area. It is important to note that property tax revenue collected by the School Board and any special district are not affected under the tax increment financing process. Further, unlike in some states, Florida taxing entities write a check to the CRA trust fund, after monies are received from the tax collector. In California, the increment is sent to the CRAs directly out of collected county tax revenues, before they are distributed to each taxing entity. The tax increment revenues can be used immediately, saved for a particular project, or can be bonded to maximize the funds available. Any funds received from a tax increment financing area must be used for specific redevelopment purposes within the targeted area, and not for general government purposes. (See <http://redevelopment.net/cra-resources/q-a-for-cras/>)

7. While these may be referred to as a property tax refund programs, the CRA “refund” is more appropriately classified as a grant for the purposes of this report. TIF-generated funds are annually appropriated to fund CRA expenditures, whether debt service on revenue bonds or any other authorized expenditure. (see *Strand v. Escambia County* 2008, in dicta. <http://caselaw.findlaw.com/fl-supreme-court/1284657.html>) CRAs do not have authority to levy property taxes, and the statutes do not authorize them to “refund” such taxes. However, they can base their long-term contractual, performance-based incentive on the amount of taxes paid.

Direct Financial Incentives

Direct financial incentives provide monetary assistance to a business from the local government or through a local government-funded economic development organization. This assistance is provided through grants, loans, equity investments, loan insurance, and loan guarantees. These programs generally address business financing needs but may also provide funding for workforce training, market development, modernization, and technology commercialization activities. Direct financial incentives are generally project specific, contingent on pre-award review and evaluation, and typically performance-based.

Direct financial incentives also include contributions in combination with state economic development incentives negotiated by the Florida Department of Economic Opportunity, such as Qualified Target Industry Tax Refund (QTI) or Quick Action Closing Fund (QACF), or in combination with other local governments.

Indirect Financial Incentives

Indirect financial incentives include grants and loans to local government entities, nonprofits, and organizations that are used to spur business investment or development. The recipients include communities, financial institutions, universities, community colleges, training providers, venture capital investors, and business incubators. In many cases, the funds are tied to one or more specific business locations or expansion projects. Other programs are used to address the general needs of the business community, including infrastructure, technical training, new and improved highway access, airport expansions, and other facilities. Funds are provided to the intermediaries in the form of grants, loans, and loan guarantees.

This type of incentive may also be used to leverage private investment in economic development. An example is linked deposit programs, in which local government funds are deposited in a financial institution in exchange for providing capital access or subsidized interest rates to qualified business borrowers. Indirect financial incentives may or may not be contingent on pre-award review of the benefitting business or businesses, depending on the nature of the project.

While many jurisdictions do business marketing and recruitment "in-house," some contract with a private Economic Development Organization (EDO) or contribute dues to a regional EDO that provides these services to local governments across a defined region. It is arguable whether the dollars provided to EDOs for general marketing or promotional services actually qualify as indirect financial incentives to businesses; however, such second-party marketing expenditures constitute a significant portion of reported local government economic development efforts, and the law requires their inclusion. For these reasons, the funds are identified and included.

Tax-Based and Fee-Based Incentives

Tax-based incentives use the tax code as the source of direct or indirect subsidy to qualified businesses. They tend to have longer lifespans and be less visible than direct financial or indirect financial incentives because they do not require an annual appropriation. In most instances, tax-based incentives are awarded upon verification of eligibility and may not be subject to pre-award review and evaluation like direct financial incentives.

Florida's counties and municipalities are limited in their ability to offer tax-based incentives, either for economic development or other purposes. With the exception of ad valorem taxes, Florida's Constitution

preempts all taxing authority to the state. Local taxes authorized by the constitution or by the Legislature may only be levied pursuant to the specifications of the governing statute. Unless specifically authorized, relief from these local taxes (credits, exemptions, or refunds) may not be granted.

Of all the local taxes, county or municipal governments are authorized to offer relief (i.e., tax exemptions) only for the following three tax sources:⁸

- Economic Development Ad Valorem Tax Exemption: Article VII, Section 3 of the State Constitution and section 196.1995, F.S., authorize counties and municipalities to grant, after referendum approval and passage of an ordinance, ad valorem tax relief from its respective levy to new or expanding businesses that meet certain job-creation and other requirements. The exemption is limited to ten years and may be restricted to businesses located in an enterprise zone or brownfield area. In addition, the exemption is contingent on pre-award review and evaluation and approval by ordinance.⁹
- Local Business Tax: Chapter 205, F.S., authorizes counties and municipalities to grant exemptions from the local business tax to a variety of specified individuals or businesses.¹⁰
- Public Service Tax: Sections 166.231–.234, F.S., authorize municipalities and charter counties to grant exemptions from the tax on certain utilities in specific situations.¹¹

Fee-based incentives use “Home-Rule” revenues as the source of direct or indirect subsidy to qualified businesses. Unless limited by law, county and municipal governments have broad authority to levy proprietary fees, regulatory fees, and special assessments within their jurisdictions. Unless restricted by law or contract (e.g., bond provisions), local governments may also grant exemptions or waivers or provide refunds or credits from these levies, either as an economic development incentive or for any other purpose. Proprietary Fees may include admissions fees, franchise fees, user fees, and utility fees. Regulatory Fees may include building permit fees, impact fees, inspection fees, and stormwater fees. While they may be collected like property taxes, special assessments are “based on the special benefit accruing to such property from such improvements when the improvements funded by the special assessment provide a benefit which is different in type or degree from benefits provided to the community as a whole.”¹²

8. Exemptions provide freedom from payment of taxes normally applied to specific business activities. Exemptions are technically distinguishable from credits (which provide a reduction in taxes due after verification that statutory or contractual terms have been met) and refunds (which typically provide a return of taxes paid after verification that statutory or contractual terms have been met).

9. The Florida Enterprise Zone program was repealed on December 31, 2015. (s. 290.016, F.S.). For purposes of the Economic Development Ad Valorem Tax Exemption, in 2016 the Legislature clarified that notwithstanding the repeal of the Enterprise Zone program, counties and cities may continue to grant exemptions enacted before the repeal to qualified businesses in the zone. (ss. 2-4, ch. 2016-220, L.O.F.)

10. Section 205.054, F.S., authorized counties and municipalities to grant a general exemption of 50 percent for “any business, profession or occupation” with a permanent business location in an Enterprise Zone. However, this exemption was repealed on December 31, 2015, with the expiration of the Florida Enterprise Zone Act. (Sections 290.016 and 205.054(6), F.S.)

11. Section 166.231(8), F.S., authorized a Public Service Tax exemption for purchasers of electrical energy who are determined to be eligible for the electrical energy sales tax exemption under s. 212.08(15), F.S., or for qualified businesses in Enterprise Zones. Both exemptions expired upon the repeal of the Enterprise Zone program. (Sections 290.016 and 166.231(8)(c), F.S.)

12. Section 170.01(2), F.S.

Below Market Leases or Deeds for Real Property

Below market leases or deeds may be awarded to businesses as an incentive to remain, expand, or locate in a jurisdiction. These can be provided either directly by the local government or indirectly through an organization authorized by the local government.

Other Strategies

Federal and state law provides counties and municipalities with other strategies to facilitate economic or community development in their jurisdictions. Historically, the following programs have not been included in the EDR survey:

- Industrial Development Authorities (IDAs).¹³
- Community Development Districts (CDDs).¹⁴
- Small Business Development Centers (SBDCs).¹⁵
- Federally funded programs, such as Community Development Block Grants (CDBG),¹⁶ Small Business Innovation Research (SBIR) grants, Small Business Technology Transfer (STTR) grants, or grants funded by the U.S. Department of Housing and Urban Development (HUD).

In all prior reports, these programs were not classified as local economic development incentives. In 2017, EDR reviewed these programs to determine whether it would be appropriate to include related expenditures in the annual survey. The following summarizes EDR's conclusions:

- Industrial Development Authorities (IDAs) are dependent special districts and Community Development Districts (CDDs) are independent special districts. Unless the responding municipality or county gave local funds directly to an IDA or CDD for economic development purposes, their activities would not be included. In the cases where the IDA or CDD did receive local funding from a municipality or county for the purpose of economic development, those funds were reported as indirect financial incentives.
- Small Business Development Centers (SBDCs) should be treated as any other recipient of local economic development funds. In all instances where the SBDC did receive local funding from a municipality or county for the purpose of economic development, those funds were reported as indirect financial incentives.
- Federally funded programs generally do not rely on the specific economic development authority provided under section 125.045, F.S., or section 166.021(8), F.S., for the expenditure of these funds at the local level. Instead, they fall under the general authority and home rule powers

13. As authorized by Part III of Chapter 159, F.S., an Industrial Development Authority (IDA) can be created for the purpose of financing and refinancing projects for the public purposes described in, and in the manner provided by, the Florida Industrial Development Financing Act (i.e., Part II of Chapter 159, F.S.). This includes fostering a county's economic development goals. IDAs are authorized to secure the issuance and repayment of industrial development bonds by a lease, mortgage, or other security instrument, subject to the county commission's approval. According to the Florida Department of Economic Opportunity's Special District Accountability Program, there were 23 active IDAs in Florida, as of April 13, 2021. (See <http://specialdistrictreports.floridajobs.org/webreports/criteria.aspx>)

14. Chapter 190, F.S.

15. While SBDCs may provide services to expanding or relocating businesses targeted by local governments, their mission is more comprehensive - serving the general business community. (See <http://floridasbdc.org/> for additional information.)

16. The U.S. Department of Housing and Urban Development distributes CDBG funding to Florida's local governments, either directly or indirectly through the state, to fund projects that develop viable communities by providing adequate housing and suitable living environments by expanding economic opportunities, principally for persons of low and moderate income.

provided by the Florida Constitution and section 125.01, F.S., and section 166.021, F.S. As such, these funds will continue to be excluded from the report.

Survey Methodology and Results

This report provides an analysis of the survey responses received from county and municipal governments and CRAs. Local officials received multiple emails from EDR, which provided an explanation of the statutory requirement and instructions for completing the online survey questionnaire. Additionally, a copy of the survey questionnaire in PDF was included with the email for local officials to review. Finally, EDR provided access to the online survey through its website.¹⁷ Consequently, all of these local government entities were notified of the statutory reporting requirements and given multiple opportunities to complete and submit a survey response.

Of the local entities invited to report economic development incentives granted during the 2017-18 fiscal year, a total of 413 (i.e., 58 counties, 246 municipalities, and 109 CRAs) completed the survey questionnaire.

County Governments

Fifty-eight of 67 county governments responded to this year's survey for a response rate of 87 percent. Of the 58 county governments that responded, 37 counties, or 64 percent, reported the following economic development incentives totaling \$80,095,569.

- Direct financial incentives: \$31,919,200 or 40 percent.
- Indirect financial incentives: \$31,972,148 or 40 percent.
- Tax-based and fee-based incentives: \$14,529,871 or 18 percent.
- Below-market rate leases or deeds for real property: \$1,674,350 or 2 percent.

Twenty-one, or 36 percent, of the 58 responding counties reported that no incentives were granted or that incentives totaled less than the minimum reporting threshold of \$25,000. Nine counties did not submit a survey response.

The following series of tables and charts summarize the reported economic development incentives by type granted by county governments during the 2017-18 fiscal year. The total number of businesses or entities receiving incentives by type are not summed since it is possible that a business or entity may receive more than one type of incentive from the same county.

17. <http://edr.state.fl.us/Content/local-government/economic-development-incentives/index.cfm>

County Governments - Total Incentives by Type					
Incentive Type	Number of Counties Granting Incentives	Total Amount Granted	Percent	Number of Businesses Receiving Incentives	Average Incentive Per Business
Direct Financial	31	\$ 31,919,200	39.9%	1,265	\$ 25,233
Indirect Financial *	28	\$ 31,972,148	39.9%		
Tax-Based and Fee-Based	16	\$ 14,529,871	18.1%	1,301	\$ 11,168
Below Market Rate Leases or Deeds for Real Property	4	\$ 1,674,350	2.1%	4	\$ 418,588
Total	37	\$ 80,095,569	100.0%		

* Indirect financial incentives provide monetary assistance to third parties to support business assistance, development, or recruitment. The number of businesses receiving such assistance are not recorded on the survey.

County Governments - Direct Financial Incentives					
Direct Financial Incentives	Number of Counties Granting Incentives	Total Amount Granted	Percent	Number of Businesses Receiving Incentives	Average Incentive Per Business
Grants	16	\$ 16,063,596	50.3%	105	\$ 152,987
Loans	2	\$ 7,061,000	22.1%	2	\$ 3,530,500
Equity Investments	0	\$ -	0.0%	0	\$ -
Loan Insurance	0	\$ -	0.0%	0	\$ -
Loan Guarantees	1	\$ 8,000	0.0%	1	\$ 8,000
Training Subsidies	3	\$ 1,578,201	4.9%	1,025	\$ 1,540
Local Match (QTI, QACF, etc.)	23	\$ 3,049,877	9.6%	118	\$ 25,846
Other	8	\$ 4,158,526	13.0%	14	\$ 297,038
Total	31	\$ 31,919,200	100.0%		

County Governments - Indirect Financial Incentives					
Indirect Financial Incentives	Number of Counties Granting Incentives	Total Amount Granted	Percent	Number of Entities Receiving Incentives	Average Incentive Per Entity
Grants	16	\$ 11,873,354	37.1%	65	\$ 182,667
Loans or Loan Guarantees	3	\$ 1,565,522	4.9%	2	\$ 782,761
Value of Contract With or Dues Paid to EDOs	23	\$ 10,289,560	32.2%	33	\$ 311,805
Appropriations to IDAs for Economic Development Purposes	1	\$ 100,000	0.3%	1	\$ 100,000
Appropriations to CDDs for Economic Development Purposes	0	\$ -	0.0%	0	\$ -
Appropriations to SBDCs for Economic Development Purposes	4	\$ 368,040	1.2%	4	\$ 92,010
Other	1	\$ 7,775,672	24.3%	1	\$ 7,775,672
Total	28	\$ 31,972,148	100.0%		

County Governments - Tax-Based and Fee-Based Incentives					
Tax-Based and Fee-Based Incentives	Number of Counties Granting Incentives	Total Amount Granted	Percent	Number of Businesses Receiving Incentives	Average Incentive Per Business
Property Tax Exemption for Economic Development	13	\$ 8,461,230	58.2%	85	\$ 99,544
Public Service Tax Exemption	0	\$ -	0.0%	0	\$ -
Business Tax Exemption	1	\$ 56,643	0.4%	1,195	\$ 47
Proprietary Fees (Credits, Refunds, Exemptions, Waivers, or Rate Differentials)	2	\$ 267,924	1.8%	2	\$ 133,962
Regulatory Fees (Credits, Refunds, Exemptions, or Waivers)	4	\$ 5,744,074	39.5%	19	\$ 302,320
Special Assessments (Credits, Refunds, Exemptions, or Waivers)	0	\$ -	0.0%	0	\$ -
Total	16	\$ 14,529,871	100.0%		

County Governments - Below-Market Rate Leases or Deeds for Real Property					
Below-Market Rate Leases or Deeds for Real Property	Number of Counties Granting Incentives	Total Amount Granted	Percent	Number of Businesses Receiving Incentives	Average Incentive Per Business
Below-Market Rate Leases for Real Property	3	\$ 1,577,550	94.2%	3	\$ 525,850
Below-Market Rate Deeds for Real Property	1	\$ 96,800	5.8%	1	\$ 96,800
Total	4	\$ 1,674,350	100.0%		

In the above chart, Other industries include aerospace, agribusiness, aviation, bioscience, clean technology, defense, distribution, eco-tourism, green business, homeland security, film industry, life sciences, sports and sports performance, and tourism.

County Governments Having Total Population of 100,000 or Greater						
County	2018 Countywide Population Estimates	Direct Incentives	Indirect Incentives	Fee and Tax- Based Incentives	Below Market Leases or Deeds	Total Incentives

Municipal Governments

Two hundred forty-six of 411 municipal governments responded to the survey for a response rate of 60 percent. Of the 246 municipal governments that responded, 47 municipalities, or 19 percent, reported the following economic development incentives totaling \$19,325,789.

- Direct financial incentives: \$5,478,993 or 28 percent;
- Indirect financial incentives: \$4,620,624 or 24 percent;
- Tax-based and fee-based incentives: \$7,691,798 or 40 percent; and
- Below-market rate leases or deeds for real property: \$1,534,374 or 8 percent.

One hundred ninety-nine, or 81 percent, of the 246 responding municipalities reported that no incentives were granted or that incentives totaled less than the minimum reporting threshold of \$25,000. One hundred sixty-five municipalities did not submit a survey response.

The following series of tables and charts summarize the economic development incentives by type granted by municipal governments during the 2017-18 fiscal year. The total number of businesses or entities receiving incentives by type are not summed since it is possible that a business or entity may receive more than one type of incentive from the same municipality.

Municipal Governments - Total Incentives by Type					
Incentive Type	Number of Municipalities Granting Incentives	Total Amount Granted	Percent	Number of Businesses Receiving Incentives	Average Incentive Per Business
Direct Financial	37	\$ 5,478,993	28.4%	200	\$ 27,395
Indirect Financial *	23	\$ 4,620,624	23.9%		
Tax-Based and Fee-Based	22	\$ 7,691,798	39.8%	85	\$ 90,492
Below Market Rate Leases or Deeds for Real Property	7	\$ 1,534,374	7.9%	31	\$ 49,496
Total	47	\$ 19,325,789	100.0%		

* Indirect financial incentives provide monetary assistance to third parties to support business assistance, development, or recruitment. The number of businesses receiving such assistance are not recorded on the survey.

Municipal Governments - Direct Financial Incentives					
Direct Financial Incentives	Number of Municipalities Granting Incentives	Total Amount Granted	Percent	Number of Businesses Receiving Incentives	Average Incentive Per Business
Grants	20	\$ 2,609,497	47.6%	106	\$ 24,618
Loans	1	\$ 145,100	2.6%	13	\$ 11,162

Community Redevelopment Agencies (CRAs)

Of the 109 CRAs that responded to the survey, 38 of them, or 35 percent, reported the following economic development incentives totaling \$29,511,959.

- Direct financial incentives: \$21,854,532 or 74 percent.
- Indirect financial incentives: \$1,324,157 or 5 percent.
- Tax-based and fee-based incentives: \$1,796,437 or 6 percent.
- Below-market rate leases or deeds for real property: \$4,536,833 or 15 percent.

Seventy-one, or 65 percent, of the 109 responding CRAs reported that no incentives were granted or that incentives totaled less than the minimum reporting threshold of \$25,000.

The following series of tables and charts summarize the reported economic development incentives by type granted by CRAs during the 2017-18 fiscal year. The total number of businesses or entities receiving incentives by type are not summed since it is possible that a business or entity may receive more than one type of incentive from the same CRA.

CRAs - Total Incentives by Type					
Incentive Type	Number of CRAs Granting Incentives	Total Amount Granted	Percent	Number of Businesses Receiving Incentives	Average Incentive Per Business
Direct Financial	33	\$ 21,854,532	74.1%	309	\$ 70,727
Indirect Financial *	12	\$ 1,324,157	4.5%		
Tax-Based and Fee-Based	3	\$ 1,796,437	6.1%	3	\$ 598,812
Below Market Rate Leases or Deeds for Real Property	4	\$ 4,536,833	15.4%	23	\$ 197,254
Total	38	\$ 29,511,959	100.0%		

* Indirect financial incentives provide monetary assistance to third parties to support business assistance, development, or recruitment. The number of businesses receiving such assistance are not recorded on the survey.

CRA - Direct Financial Incentives					
Direct Financial Incentives	Number of CRAs Granting Incentives	Total Amount Granted	Percent	Number of Businesses Receiving Incentives	Average Incentive Per Business
Grants	30	\$ 20,648,020	94.5%	296	\$ 69,757

Historical Summaries

The following tables summarize the economic development incentives reported by counties and municipalities for the 2010-11 through 2017-18 fiscal years and CRAs for the 2016-17 through 2017-18 fiscal years, as reported in this and prior years' reports. Only those local entities that reported incentives in one or more fiscal years are listed. Blank cells in those tables indicate that the entity had no incentives or did not respond to the survey in that particular fiscal year.

The final table of this report summarizes the county and municipal values of business-owned properties that received the Economic Development Ad Valorem Tax Exemption for 2010 through 2018, as compiled by the Florida Department of Revenue. The value of the exemption to a qualified business is determined by applying the respective county or municipal millage rate to the exempted property.

Note: This table reflects the value of exemptions pursuant to s. 196.1995, F.S. The 2017 values have been updated to reflect any changes from the post-Value Adjustment Board (VAB) tax rolls, and the 2018 values are pre-VAB finals. A major change between 2017 and 2018 values is the expiration of the economic development exemption for Amazon in Hillsborough County.
