

FLORIDA ECONOMIC OUTLOOK

The Florida Economic Estimating Conference met in the July of 2007 to revise the forecast for the state's economy. As further updated by EDR, the latest forecast shows the economy expanding at a much more modest pace, significantly slower than the 2004-05 banner year. Population growth continues to be the state's primary engine of economic growth, fueling both employment and income growth. All of the comments below are directed to the immediate planning horizon extending through Fiscal Year 2010-11.

RECAP ~ Fiscal Year 2006-07 History

The change in Gross Domestic Product (GDP) is frequently used to compare states. While Florida has significantly outperformed the nation in five of the past six years, two of these years (2004 and 2005) have been greatly influenced by the activity sparked by the 2004 and 2005 storms (primarily enabled by insurance payments). More recently, Florida returned to the national growth level.

Other factors are used to gauge the health of an *individual state*. Typically, the two principal economic measures are income and employment growth. Compared to the October 2006 Estimating Conference, these measures have shown that Florida grew at a slower pace than originally thought. Personal income growth, initially estimated at 7.5%, ultimately reached only 7.3% for Fiscal Year 2005-06 and dropped to 6.5% in Fiscal Year 2006-07. Similarly, employment achieved only 3.7% growth in Fiscal Year 2005-06, even though the forecast called for 3.8%, and further declined to a modest 1.8% rate in Fiscal Year 2006-07.

While many near-term projections were revised downward in the February 2007 forecast for 2006-07, the final results proved to be generally worse than anticipated – particularly

in the housing-related areas. For example, the number of private housing starts was reduced by 6.6% in February and then by another 3.3% in the following July. Other sectors were also affected: the number of new light vehicle registrations dropped 3.6% in February and another 2.1% at the latest conference.

Throughout the 2006-07 fiscal year, the end of the housing boom coupled with increasing mortgage rates caused residential construction activity to dramatically lose steam. The Florida Economic Estimating Conference (FEEC) was expecting private housing starts to begin a slow decline in the early summer. In fact new activity plummeted below the anticipated levels through the end of the fiscal year. For Fiscal Year 2006-07, there were only 157,200 starts, a 42.2% decrease over the prior year. Much of this loss was attributable to single family starts which ended up falling 51% from the prior year to a level of 88,200 units. Adding to the housing woes, existing single family home sales ended the year 30% down from the prior year, with a 5% decline in median sales price.

FORECAST ~ Fiscal Years 2007-08 (base) through 2010-11

Income...Nominal personal income is projected to grow a modest 5.6% in Fiscal Year 2007-08, equaling the projection for the national forecast. However Florida's income growth is expected to rebound slightly next year to 6.6%, ending the Outlook period at 6.7%. Per capita income as adjusted for inflation exhibits the same pattern—in real terms, income is expected to increase only 1.3% this year, grow 2.3% in Fiscal Year 2008-09, and end the planning period at 2.7%. Much of the future strength in personal income can be attributed to accelerating wage gains due to upward pressure from the tightening labor market. Given lower productivity gains, this assumption may prove to be overly optimistic. However, property income and transfer payments will also contribute strength. After several years of declines and suppressed activity arising from low interest rates and a stock market that was moving sideways, growth in property income is projected to average 8.2% this year, nearly matching last year's level. It is expected to reach 10.7% in Fiscal Year 2008-09, 10.8% in Fiscal Year 2009-10, and 8.5% in Fiscal Year 2010-11.

Employment...According to the latest nationwide data, Florida had a job growth rate (1.6% in July) just above the national average. This ranks Florida third in job growth among the ten most populous states, behind Texas and California. The state's job growth has been slowing since reaching a peak of 5.2% in September 2005. The current slowdown is primarily attributable to declines in the construction industry. Future years will likely see stronger levels of growth than the current year, but still significantly below the 2004-05 banner year. Overall employment is projected to grow just 0.9% in Fiscal Year 2007-08, increase to 1.8% in Fiscal Year 2008-09, 2.6% in Fiscal Year 2009-10 and then return to 2.4% in 2010-11.

Conversely, Florida's latest unemployment rate (3.9% in July) was the lowest among the 10 most populous states, although higher than it was a year ago. The national average was 4.6%. The July number is higher than expected for Florida – the estimate anticipates future levels of 3.74%, 3.52% and 3.48% over the next three years.

Florida Industry	Percent of Total Average Annual Employment, 2006 (preliminary)	Average Annual Wage, 2006 (preliminary)
Total		\$38,498
Natural Resource and Mining	1.2%	\$24,185
Construction	8.0%	\$40,744
Manufacturing	5.1%	\$45,732
Trade, Transportation and Utilities	20.0%	\$35,305
Information	2.1%	\$55,016
Financial Activities	6.8%	\$54,488
Professional and Business Services	16.9%	\$41,676
Education and Health Services	11.8%	\$39,804
Leisure and Hospitality	11.4%	\$20,037
Other services	3.1%	\$26,983
Government	13.4%	\$42,980

Currently, the fastest growing industry in Florida is Education and Health Services, with most of the growth attributable to gains in Health Services. Beginning in Fiscal Year 2008-09 and continuing throughout the forecast period, the growth industry will shift to the professional and business services sector. This employment sector is expected to add nearly one-half of the new jobs forecast for Fiscal Year 2008-09. After growing 2.1% this year, it is projected to expand another 4.9% in Fiscal Year 2008-09 and 5.2% in 2009-10 before decelerating to 4.5% in 2010-11. Slightly over half of the growth in this industry is concentrated in employment agencies, temporary help and leasing services, janitorial and cleaning services, exterminating and pest control services, and landscaping. In this respect, Florida is part of a national trend. According to the U.S. Department of Labor, the employment services sector is expected to be among those that provide the most new jobs. However, Florida differs from the nation in that our single fastest growing industry does **not** continue to be education and health services. In part, this is a data collection problem. Many companies providing temporary help and leasing services are actually benefiting the other sectors.

Three industry sectors are expected to shed jobs this year: natural resources and mining, manufacturing, and construction. Altogether 62,300 jobs will be adversely affected, with

95% of them coming from the construction sector. After three years of phenomenal growth, this is consistent with the much weaker housing market forecast. Strength will not return to this industry during the forecast period, although growth returns in Fiscal Year 2009-10.

All other sectors are expected to expand, albeit somewhat modestly. While the information services industry is expected to gain jobs in Fiscal Year 2007-08 after losing jobs during most of the prior four years, the forecast calls for employment to increase an additional 0.7% in each of the next two years and then further expand by 1.1% in 2010-11.

The overall unemployment rate is expected to reach 3.71% this year, higher than the 2006-07 banner year. From there it gradually rises to 3.74% in Fiscal Year 2008-09 as the labor force expands faster than the economy can absorb the new entrants and then drops back to 3.48%. Each of these levels is significantly less than the projected national averages. In July 2007, unemployment reached 4.6% nationally. A noteworthy twenty-two Florida counties (fully one-third of the total) had unemployment rates higher than that (although the data has not seasonally adjusted).

Construction... Vigorous home price appreciation that outstripped gains in income and the use of speculative financing arrangements made Floridians particularly vulnerable to the decelerating housing market and interest rate risks. In 2006, almost 47% of all mortgages in the state were considered to be innovative (interest only and pay option ARM). With the federal funds rate standing at 5.25%, the meltdown in the subprime mortgage market and the subsequent credit crunch, housing starts are well into a significant decline that continues through Fiscal Year 2007-08 before beginning a modest rebound. Single-family starts are the primary driver. Total construction expenditures follow a similar pattern, never returning to the 2005-06 level during the forecast. Growth in private nonresidential construction is projected to decelerate to 7.9% this year from a high of 16.7% in Fiscal Year 2006-07, and then moderate more in the out-years. Meanwhile, after posting a 18.3% gain last year, public construction activity is projected to expand 10.9% this fiscal year and then decline 6.7% next year, before returning to modest growth.

Population & Other... Population growth has hovered between 2.0% and 2.6% since the mid 1990's; however, the population growth rate of 2.25% for next year reflects the highest rate that will be achieved over the immediate forecast period. This number will likely be reduced at the next Estimating Conference, but even so, the annual growth rate is expected to stay around 2% throughout the planning horizon. This allows Florida to stay on track to become the third largest state in the nation sometime shortly after 2010, surpassing New York. And in 2007, the state's age mix will shift for the first time to produce a higher percentage of persons aged 45-64 than persons aged 25-44, a phenomenon arising from the aging baby boom population.
