

**Voluntary Prekindergarten Estimating Conference
Executive Summary
July 30, 2014**

The Voluntary Prekindergarten Estimating Conference met on July 30, 2014 to review 2013-14 school year data and 2014 summer data reported through June 2014, and to adopt a forecast through 2017-18. Overall, the forecast was revised slightly downward; however, VPK regular program year enrollment is still expected to grow from year-to-year. The forecast utilizes the most recent ratio of FTE to enrollment (2013-14 school year and 2013 summer).

The changes in enrollment and FTE for 2013-14 and the forecast years as compared to the March Estimating Conference are mainly due to the lower than anticipated 2013-14 school year data and slightly revised population growth rates for Florida’s four-year-old population. Based on the reported level of enrollment for the 2013-14 program year, the participation rate is estimated to be 77.4% and is expected to remain around this level throughout the forecast horizon.

The Conference also reviewed Specialized Instructional Services Program (SISP) data. Currently the data for this new program are incorporated as follows:

- Reported for the 2012-13 school year and 2013 summer programs (program year 2012-13).
- Reported for the 2013-14 school year and estimated 2014 summer.
- “SISP Only” refers to SISP children who either:
 - Came directly into SISP, or
 - Had SISP participation into another fiscal year.
- “SISP Only” enrollment and FTE are held constant in the forecast years to the reported levels for the 2013-14 school year and those estimated for 2014 summer.
- Each “SISP Only” student is forecast to earn 1.0 FTE.

Terminology

| Terminology | |
|---------------------------------------|---|
| Enrollment | Headcount of students in a program; unduplicated state and duplicated counties. |
| Fiscal Year | July 1 - June 30 (Includes part of summer enrollment from two program years). |
| Full-Time Equivalent (FTE) Enrollment | One Full-Time Equivalent Enrollment represents one child enrolled for the entire program. FTE calculation is based on the number of hours paid divided by 540 or 300 depending on the child's program (either 540 for the School Year program or 300 for the summer program). |
| Participation Rate | Program Year enrollment divided by the estimated/forecasted October 1, population of 4-year olds. |
| Program Year | Includes the VPK School Year and Summer Programs based on eligibility as determined by date of birth. |
| Public School Round-up | The public school FTE enrollment round-up refers to adding enrollment to public school FTE enrollment if the level of enrollment is not a multiple of 12 for summer 2009 and beyond and a multiple of 10 for summers 2007 and 2008. |
| School Year | 540 hour VPK Program that runs from July/August (varies by county) until May/June. |
| SISP | Specialized Instructional Services Program |
| SISP Only Enrollment | Specialized Instructional Services Program Enrollment, never present in VPK |
| Summer | 300 hour VPK Program that runs from May/June to July/August. |
| Summer - May/June | Portion of the 300 hour VPK Program that runs from May/June. |
| Summer - July/August | Portion of the 300 hour VPK Program that runs from July/August. |
| VPK | Voluntary Prekindergarten activity excluding SISP |

4-year old Prekindergarten Participation Rates in Selected States

The National Institute for Early Education Research (NIEER), a unit of Rutgers University, has published annual state prekindergarten reports since the 2001-2002 program year. For the State of Preschool 2013 report, Washington DC's prekindergarten program was reclassified as one entity. NIEER originally regarded Washington DC's program as either charter or public because there were different restrictions and standards for each program, but now they are considered to be one entity since both programs must follow the same requirements for funding.

In Table 1, the nine states (and Washington DC) have the highest percent of 4-year-olds enrolled in state prekindergarten in 2012-2013. Nationwide, only Florida and West Virginia offered a 4-year old universal prekindergarten program as defined by eligibility for all 4-year olds, no funding cap, and 100 percent district participation. The funding cap is defined as whether or not the state has a waiting list for students seeking enrollment. Each state's prekindergarten program may differ in terms of options for three-year olds, enrollment criteria beyond age requirements, funding, academic standards, district participation, and operating schedules.

Participation rates represent the number of 4-year-old enrollments divided by the US Census Bureau population estimate of 4-year-olds. Rates were calculated by NIEER for the school years 2008-09 through 2012-13, while the 2013-14 participation rates were calculated by dividing the state reported enrollments of 4-year olds by the 2013 US Census estimates of 4-year olds. Florida's 2013-14 4-year old participation rate was taken from the July 2014 Voluntary Prekindergarten Estimating Conference. Enrollment numbers for the 2013-2014 school year were gathered from each state. *The State of Preschool 2014* will be published in April 2015.

Major findings from State of Preschool 2013 report include:

1. An unchanged nationwide participation rate of 28% for 4-year olds.
2. The first observed decrease in estimated enrollments of 9,160 4-year olds since reporting began in 2001-2002.
3. Washington DC served the greatest percentage of 4-year olds followed by Florida, Oklahoma, and Vermont in 2012-13.
4. South Carolina fell out of the top ten to the eleventh spot with the addition of Washington DC.
5. Between the 2011-2012 and 2012-2013 program years, Iowa and Vermont had the greatest percentage increases in 4-year old participation rates (5 percentage points) by adding 3,045 and 249 students, respectively.
6. Arkansas, California, Connecticut, Illinois, Pennsylvania, and South Carolina had the greatest percentage decreases in their 4-year old participation rates (1 percentage point) with California having the greatest reduction in students, 14,392 during this time period.
7. In comparing West Virginia and Florida (the only universal programs), both states decreased in enrollments from 2012-13 to 2013-14. Comparisons to larger states such as California, New York, and Texas are less appropriate because they do not have universal prekindergarten programs as defined above.
