Revenue Estimating Conference Ad Valorem Assessments March 06, 2013 Executive Summary

Estimates of the statewide property tax roll are primarily used in the appropriations process to approximate the Required Local Effort (RLE) millage rate. This is the rate local school districts must levy in order to participate in the Florida Education Finance Program. In the new forecast, the 2013 certified school taxable value is now estimated to be \$1,392.33 billion. This represents an increase of \$7.27 billion or a 0.53% percent increase from the December 2012 forecast (\$1,385.06 billion). At 96 percent, the value of one mil is projected to be \$1,336.6 million.

Florida's housing market continues to show signs that expected improvement is being realized. Statewide, the fourth-quarter Federal Housing Finance Agency Housing Price Index records a price improvement of 1.5% relative to the preceding quarter, indicating that price increases are occurring in key areas of the state. The HPI is a measure of the movement of single-family house prices; however, it is only a repeat-sales index, meaning that it measures average price changes in repeat sales or refinancings on the same properties within the Fannie Mae or Freddie Mac inventory. Adding to the limitations, it only addresses actual transactions involving conforming, conventional mortgages and excludes higher valued properties. In this regard, the Conference is particularly concerned that the foreclosure inventory of residential properties in Florida remains high, and its future effects are not reflected in the current HPI readings. Foreclosures are expected to add more units to the supply of housing further weakening average sales prices of all homes on the market. In addition, the relatively low average sales prices for foreclosed homes may depress values for neighboring property. Consequently, Florida's housing market is projected to continue its slow recovery.

County (non-school) taxable value is lower than school taxable value due to the greater number of exemptions available to property owners. In recent years, the Revenue Estimating Conference has been forecasting county taxable value separately from school taxable value. County taxable value on January 1, 2013 is projected to be \$1,289.49 billion. On an annual basis, this represents an increase of \$7.07 billion from the December 2012 forecast (\$1,282.43 billion).
