

**Public Schools PreK-12 Education Estimating Conference**  
**Executive Summary**  
**December 18, 2012**

The Public Schools PreK-12 Education Estimating Conference met in December 2012 to review 2012-13 third calculation data and to adopt revised PreK-12 FTE enrollment forecasts for 2013-14 through 2015-16. The previous conference that adopted FTE enrollment forecasts was held on July 20, 2012.

***Key Assumptions***

- Continuation of recent historical patterns --- The most recent growth patterns are expected to continue for the base forecast.
- Effects of 2011 and 2012 legislation --- Recent legislation has the potential to affect the FTE enrollment levels. Changes affecting charter schools and virtual education may increase the FTE enrollment and changes affecting the tax credit scholarship program may decrease the FTE enrollment.

***Analysis and Trends***

- The 2012-13 third calculation FTE shows a growth of 29,646.73 FTE over the 2011-12 final FTE. The 2012-13 third calculation is 2,087.88 FTE higher than the appropriation. This is due to higher enrollments for the Florida Virtual School and lower enrollment in the total of the remaining 74 districts. The 2013-14 FTE forecast growth over the 2012-13 third calculation FTE is 20,273.37.
- Career Education --- The 2012-13 third calculation FTE enrollments show a decline in funded FTE for career education, reflecting 2012 legislation reporting changes.
- The Florida Virtual School --- The 2011 Legislature added a full-time K-12 program and the 2012 Legislature expanded the eligibility for the full-time and part-time programs. Both the part-time and full-time programs are expected to grow during the forecast time period, with most of the growth occurring from the part-time program including Virtual Learning Laboratories. Some of the expected growth in the full-time program is expected to come from students entering from private and home-schooled education.
- Charter Schools --- New charter schools will continue to attract students to public education. The growth due to new charter schools is expected to increase as high performing charter schools are allowed more flexibility for expansion and replication. Although most of the students enrolled in the new charter schools will have previously been enrolled in a traditional public school, there is expected to be some students in private and home-schooled education attracted to the new charter schools.
- Tax Credit Scholarship Program --- The 2012 Legislature increased the tax credit cap for this program. The higher cap will allow additional tax credit scholarships to be provided. Thus, this change has a potential to decrease the public school FTE enrollment.

Tables 1-3 have comparisons of the forecast with previous years and with the July 20, 2012 forecast.

### **General Notes**

The Education Estimating Conference for Public School Enrollment forecasts full-time equivalent (FTE) students whose educational instruction is funded through the Florida Education Finance Program (FEFP). There are ten program categories in two groups:

#### Group 1

- Three for basic education students who are not exceptional education students (101: for PK through Grade 3; 102: for Grades 4 through 8; 103: for Grades 9 through 12) and
- Three for basic education exceptional educational students by grade grouping (111, 112, 113).

#### Group 2

- One for English Language Learners (130),
- Two for exceptional education students who need higher levels of services (254, 255) and
- One for students taking career education instruction (300).

The funded educational time for a student may be in a single program category or spread through two or more program categories.

The FEFP is calculated five times throughout the year to arrive at each year's final appropriation. Each calculation ("calc") uses the latest information regarding the number of students that is available:

- (1) First Calculation – This calculation is completed immediately after the annual legislative session. Student counts are based on the forecast made for the Legislature.
- (2) Second Calculation – This calculation is made upon receipt of the certified tax roll from the Department of Revenue. Student counts are based on the forecast made for the Legislature.
- (3) Third Calculation – This calculation is made upon receipt of districts' October survey FTE reported in November and estimated June FTE reported in November.
- (4) Fourth Calculation – This calculation is made upon receipt of districts' February FTE and estimated June FTE reported in March.
- (5) Final Calculation – This calculation is made upon receipt of districts' June FTE reported in July.

'PK' figures include only pre-school age children with disabilities (ESE) and pre-school age children whose parents are in the Teenage Parent Program. It does not include children participating exclusively in the Voluntary Prekindergarten Program who receive those services through the public school system.
