

Revenue Estimating Conference
Lottery Revenues
Last conference held: October 14, 2004

Executive Summary

The Consensus Estimating Conference on Lottery revenues raised expected distributions to the Educational Enhancement Trust Fund (EETF) from current projections by \$31.6 million in 2004-05 and by \$67.5 million in 2005-06. These figures translate into growth rates of 6.0% in 2004-05 and 4.2% in 2005-06.

There are several major components to the change in the forecast. The first major change is a result of a new Lottery vendor contract which goes into effect on January 31, 2005. At that time, approximately 2000 retailers who currently sell only scratch-off tickets will be able to sell all on-line products as well. Given that fact, and other enhancements provided by the new system, projected ticket sales were increased by \$38.7 million in 2004-05 and by \$91.5 million in 2005-06, with corresponding increases of \$13.8 million and \$32.5 million in transfers to the EETF.

Additionally on the positive side, scratch-off game sales have been running much higher than expected, ending last year \$43.9 million above estimate and exceeding the estimate by almost \$100 million during the current fiscal year. That trend is expected to continue for the remainder of this fiscal year and into 2005-06, although at a declining rate. As a result, the forecast for scratch-off game sales was increased by \$320.1 million (not including an additional \$7.4 million due to the new contract) in 2004-05, and by \$324.3 million (not including an additional \$17.6 million due to the new contract) in 2005-06. Dampening the effect of the increase on education funding is a decline in the expected transfer rate to the EETF because the sales are concentrated in higher prize payout games. In spite of the lower expected transfer rates, transfers to the EETF from scratch-off game sales (in addition to those resulting from the new contract) are still expected to be higher than previously projected by \$46.4 million in 2004-05 and \$46.9 million in 2005-06.

The positive impacts of the above factors were partially offset by two negative impacts. Four major hurricanes hit the state of Florida during August and September of 2004. Based on statistics provided by the Department of the Lottery, the conference estimates that the storms caused a reduction of approximately \$40 million in Lottery sales in 2004-05, with a corresponding decline in transfers to the EETF of about \$12 million. Additionally, Lotto sales have been running considerably below forecast levels, losing close to \$100 million (in addition to the hurricane impact) since the February forecast. The major reason for the lower sales has been the lack of rollovers, along with lower interest rates, both of which result in lower advertised jackpots. The Lotto forecast was reduced by \$66.2 million in 2004-05 and by \$30.5 million in 2005-06, before adding the impact of the new contract.

Total ticket sales and transfers to the EETF are shown below.

Tables showing proceeds from ticket sales are available for viewing and downloading in Acrobat .pdf format. A financial retrospect for 2003-04 and financial outlook for 2004-05 and 2005-06 are also available.
