

**Revenue Estimating Conference
Lottery Sales
July 31, 2012
Executive Summary**

The Revenue Estimating Conference met concerning Lottery revenues on July 31, 2012 to update the forecast adopted on July 12, 2012. The forecast was corrected to reflect the nonrecurring nature of the additional \$4.0 million appropriated for advertising for 2012-13. The forecast for total income was decreased from the prior estimate by \$20.9 million annually beginning in 2013-14, resulting in a reduction in expected distributions to the Educational Enhancement Trust Fund (EETF) of \$2.3 million a year beginning in 2013-14. As a result, annual growth rates for EETF distributions are 2.9% in 2012-13 and 1.6% in 2013-14. Distributions are then expected to increase by 1.1% in 2014-15, and 1.2% in 2015-16. Additionally, the conference increased 2011-12 EETF distributions to \$1,316.6 million based on the most recent available information. The highlights for the prior conference (held July 12) are immediately below.

Executive Summary July 12, 2012

Overall the forecast for total income was increased by \$262.3 million in 2012-13, and increased by \$231.1 million in 2013-14. The largest increase in the sales forecast was to the projection for Scratch-off sales, which were increased by \$159.6 million in 2012-13 and \$155.6 million in 2013-14. The conference projected that sales for Powerball will continue to increase in 2012-13 and stabilize in 2013-14.

The conference had estimated that Lotto would have been negatively impacted in 2011-12 as a result of the Powerball game ticket price increase from \$1 to \$2 effective January 15, 2012. Contrary to expectations, sales of Lotto increased in 2011-12 from 2010-11 by \$7.6 million to \$419.0 million. However, sales of Lotto are expected to decline slightly in 2012-13.

Small positive adjustments were made for Mega Money, Fantasy Five, and Cash 3 for 2012-13, while Play 4 was slightly reduced. The conference also added \$20.0 million in sales for a new Raffle game in 2012-13. The last time that Lottery held a Raffle was in 2010-11. Sales of Lucky Lines have experienced a sharp decline in recent years, and the prior estimate for 2012-13 was further reduced by \$3.1 million for a revised growth rate of -34.1%.

The projections for non-ticket income were reduced by \$1.0 million each year of the forecast. The forecast for 80% unclaimed prizes available for immediate transfer to EETF was also reduced from the previous forecast of \$45.2 million in 2012-13 to \$34.0 million. This is due to elimination of free Scratch-off tickets being offered as prizes in Scratch-off games.

The details of the forecast and changes are shown in the table on the next pages.
