

Revenue Estimating Conference Lottery Sales Executive Summary

July 14, 2014

The Revenue Estimating Conference reviewed Lottery revenues on July 14, 2014, and decreased the overall forecast from the one adopted in February. Expected distributions to the Educational Enhancement Trust Fund (EETF) were \$22.2 million less than expected for Fiscal Year 2013-14 and are projected to be \$25.6 to \$50.5 million less than previously forecasted in subsequent fiscal years. The forecast for total ticket sales was decreased from the February estimate by approximately \$65.6 to \$144.4 million for fiscal years 2014-15 through 2018-19. The growth rates vary across games based on historical sales data and trends, but most of the decline in the estimate is due to lower projections for Powerball and Lotto ticket sales.

Scratch-off ticket sales have seen very strong and consistent growth recently, with growth rates of 15.3%, 18.0%, and 12.8% in Fiscal Years 2011-12, 2012-13, and 2013-14, respectively. Scratch-off ticket sales were right on estimate for Fiscal Year 2013-14, but sales appeared to weaken slightly in the last two months. As a result, scratch-off sales are projected to continue to grow, but at slightly lower rates than in the previous forecast. The growth in scratch-off ticket sales is largely the result of introducing both new games and full service vending machines at many retail locations throughout the state.

The forecast for Mega Millions was decreased by about \$7 million each fiscal year, reflecting the relatively stable weekly sales levels that have been seen since there was a major game change implemented in October 2013. The projections for Powerball were decreased substantially from the prior forecast. The new estimates are approximately \$45 million lower than the February estimates in each fiscal year. It appears that Powerball has been adversely affected by the increased competition from Mega Millions, as Mega Millions generates much larger jackpots now relative to when it was introduced in May 2013. In addition, there seems to be an emerging trend that ticket purchasers are less responsive to jackpot size. This results in relatively stable sales from week to week, as very large jackpot amounts are needed to generate substantial excess ticket sales.

Mega Money was renamed Lucky Money effective July 2, 2014, and along with the name change received advertising support and an EZ Match game enhancement. As a result, the conference increased the estimate for this game by \$8.4 million for Fiscal Year 2014-15, as these changes are expected to boost sales, and differentiate the game from the similarly named Mega Millions. Mega Money ticket sales are expected to grow slowly at around half a percent each year thereafter.

The forecast for Lotto ticket sales was decreased by \$15 million for Fiscal Year 2014-15 to reflect the recent activity level. Lotto ticket sales have been trending downward for many years, and the new forecast expects continued declines through Fiscal Year 2019-20. Fantasy Five and Cash 3 ticket sales were revised upward slightly, based on positive performance for the last fiscal year and relatively stable historical trends. The Play 4 estimate was increased by approximately \$10 million each fiscal year as ticket sales are expected to increase as a result of a new game enhancement.

The projections for non-ticket income were decreased from \$12.6 to \$11.0 million each fiscal year. The forecast for unclaimed prizes available for transfer to EETF was decreased slightly by about half a million each fiscal year from the previous forecast due to the lower level of projected ticket sales.

The details of the forecast and changes are shown in the following table.

Summary of All Games				
		Feb 2014	July 2014	Difference

Distribution to EETF from Lottery Receipts	1463.3	1490.2	1513.7	1540.1	1558.5	1606.8	1628.3

NOTE: Since the Lottery's inception, the conference has estimated transfers to EETF by examining the Lottery's weekly sales during the fiscal year. However, in practice there is a delay in the transfer of weekly sales receipts from the retailers to the Lottery. Depending on what day the fiscal year ends, this delay ranges from one to two weeks. Beginning with the November 2012 estimate, the conference based the expected transfers to EETF on the cash actually received by the Lottery during the fiscal year. While the conference will continue to develop the estimate based on weekly retailer sales, the results will be adjusted to take into account the delay in the transfers from the retailers to the Lottery. This page describes the calculation of the adjustment.
