

Revenue Estimating Conference Lottery Sales Executive Summary

July 30, 2015

The Revenue Estimating Conference reviewed Lottery revenues on July 30, 2015. Total ticket sales for Fiscal Year 2014-15 were \$31.7 million over estimate, but due to both technical and timing issues, the transfer to the Educational Enhancement Trust Fund (EETF) was \$23.7 million less than expected for the fiscal year. Beginning with the new forecast, the Conference has incorporated an additional adjustment to the expected EETF distributions to address the timing issue associated with the transfer. This adjustment results in the EETF transfer estimates being slightly lower than they otherwise would have been (approximately \$5.6 million per year); however, the negative adjustments to the forecast will be balanced out by corresponding adjustments on subsequent Outlook documents. The total ticket sales forecast has been increased by \$26.5 to \$49.8 million per year relative to the February forecast. The growth is primarily a result of higher scratch-off sales and additional sales from a holiday raffle this fiscal year, and is partially offset by declines in some of the terminal games.

Scratch-off ticket sales were \$33.6 million over estimate for Fiscal Year 2014-15, resulting in 9.0% growth over Fiscal Year 2013-14. The July forecast maintains very similar growth rates to the current forecast for scratch-off sales, but since the growth starts from a higher level, the result is an increase in ticket sales of \$37.7 to \$56.2 million each fiscal year.

Actual Powerball ticket sales were \$15.3 million lower than the estimate for FY 2014-15. The Conference maintained current growth rates for the forecast, which resulted in a \$15.0 to \$16.0 million decline in Powerball ticket sales each fiscal year. Mega Millions ticket sales were also under estimate for the year by \$3.7 million, leading the Conference to reduce this forecast as well by \$7.9 to \$9.0 million each fiscal year going forward.

Lotto ticket sales for FY 2014-15 came in under estimate by \$6.1 million. To account for the lower than expected level of activity, the new forecast reduces expected lotto ticket sales by \$6.4 to \$7.9 million each fiscal year. As expected at the last Conference, ticket sales for Lucky Money in Fiscal Year 2014-15 were over 29% higher than they were in Fiscal Year 2013-14. However, the forecast for this game was decreased to a much lower level after discussion that the strong performance was a temporary response to the name change and associated increased promotional activity. The forecasts for the remaining terminal games (Fantasy Five, Cash 3, and Play 4) were all increased slightly to reflect actual ticket sales in FY 2014-15. The growth rates for these games in subsequent fiscal years remain the same or very similar to the February 2015 forecast.

The new forecast for expected distributions to the EETF is \$7.9 million higher in FY 2015-16 and lower by \$6.3 to \$9.0 million each year through FY 2018-19. In addition to the timing adjustment described earlier, projected transfers to the EETF have been affected by the overall lower levels of unclaimed prizes expected throughout the forecast, likely due to scratch-off sales comprising a larger share of total sales. FY 2019-20 was also impacted by a correction to an error in the February package.

The details of the forecast and changes are shown in the following table.

NOTE: Since the Lottery's inception, the conference has estimated transfers to EETF by examining the Lottery's weekly sales during the fiscal year. However, in practice there is a delay in the transfer of weekly sales receipts from the retailers to the Lottery. Depending on what day the fiscal year ends, this delay ranges from one to two weeks. Beginning with the November 2012 estimate, the conference based the expected transfers to EETF on the cash actually received by the Lottery during the fiscal year. While the conference will continue to develop the estimate based on weekly retailer sales, the results will be adjusted to take into account the delay in the transfers from the retailers to the Lottery. This page describes the calculation of the adjustment.
