

Demographic Estimating Conference
Executive Summary
July 6, 2016

The Demographic Estimating Conference met on July 6, 2016 to adopt a new population forecast. The data reflect final April 1, 2015 household estimates, in addition to other recent demographic and economic-related data. In the short-term, the population projections were revised down very slightly.

Population growth in Florida continues to strengthen. Historically, Florida's population growth has been driven by net migration (more people permanently moving into the state than leaving). However, net migration fell to record low levels during much of 2008 and into 2009, accounting for just 25.7% of population growth during FY 2008-09. During that time period, natural increase (births minus deaths) actually exceeded net migration. Net migration includes both domestic and international migration, and it was primarily the domestic migration component that led to the slowdown in population growth. The lower levels of net migration were largely due to national economic conditions, including weakened housing markets and other effects from the Great Recession that made it difficult for people in other states to relocate to Florida. Reflecting migration's return as a decisive factor, the expected net migration share of Florida's FY 2015-16 population growth is 90.1%.

Florida's population is expected to have grown by 314,051 (1.58%) between April 1, 2015 and April 1, 2016, representing the greatest annual increase in population since 2006. Annual population change is expected to remain above 300,000 net new residents per year for the next five years.

| April 1 | Population | Percent Change | Change |
|---------|------------|----------------|---------|
| 2012 | 19,074,434 | 0.90% | 169,364 |
| 2013 | 19,259,543 | 0.97% | 185,109 |
| 2014 | 19,507,369 | 1.29% | 247,826 |
| 2015 | 19,815,183 | 1.58% | 307,814 |
| | | | |
| 2016 | 20,129,234 | 1.58% | 314,051 |
| 2017 | 20,443,216 | 1.56% | 313,982 |
| 2018 | 20,755,036 | 1.53% | 311,820 |
| 2019 | 21,063,392 | 1.49% | 308,356 |
| 2020 | 21,369,497 | 1.45% | 306,105 |

Between April 1, 2015 and April 1, 2020, population growth is expected to average 310,863 net new residents per year, representing a compound growth rate of 1.52% over this five-year time horizon. These increases are analogous to adding a city slightly larger than Orlando every year.

Of note, the population estimates developed by the U.S. Census Bureau continue to be higher than the official state estimates adopted by the Demographic Estimating Conference. As of July 1, 2015, this difference was over 375,000 persons. The Legislative Office of Economic and Demographic Research is continuing to work to further understand how the different methodologies contribute to the difference in the two sets of estimates.

Demographic Estimating Conference
City of Miami Appeal
Executive Summary
October 13, 2016

The Demographic Estimating Conference met on October 13, 2016 to hear an appeal by the City of Miami to the recommended April 1, 2016 population estimate for their area. The preliminary population estimates are prepared by the University of Florida, Bureau of Economic and Business Research (BEBR) under contract with the Florida Legislature and distributed to local governments for their review. The City of Miami filed the appeal after discussions with BEBR had resulted in a modified preliminary estimate that was still short of the City's own internal estimate.

Presentations were made by the City of Miami, their representatives, and BEBR. After a discussion about the City of Miami's methodology and BEBR's estimate, the principals denied Miami's appeal and accepted the recommended population estimate of 456,089 from BEBR.
